

WELDPULSE

WELDING PROCEDURE READY

All you need to start welding is within WeldPulse software with its innovative and smart feature of QuickWeld supported with modules necessary to further evaluate.

QUICKWELD

Basic data of two materials to be welded together and their joint thickness would provide you with the following outputs:

1. Electrode / filler
2. Pre-heat, inter-pass and post heat treatment requirements
3. P-No., F-No., A-No. information to provide exact specifications of provided output
4. General notes wherever applicable for dissimilar welding
5. Profile based smart outputs (Novice, Beginner, Professional)
6. Assists in preparing initial information needed for welding procedure qualifications
7. Provides support in auditing necessary welding data as provided in WPSs & PQRs

YOUR WELDING PROCEDURE COMPANION

Download your copy

www.WeldPulse.com

WPS, PQR & WPQ FORMS WITH ALL DETAILS

Arc Edition contains forms for WPS, PQR and WPQ to have them all saved and retrieve when needed. Feature particularly required by Companies to enable their users having all records in place

PROPERTIES

How important is the quick access to the materials and fillers mechanical properties to know more about the weldability, weldment, and eventual weld performance

WELDING CALC

Software contains a welding calculator providing welding cost, ferrite number check, carbon equivalent, and heat input,

TRAIN ME!

Enable all the users to get themselves trained on welding procedure, performance, and other details through short videos within the software

PetroStreet Drive

WeldPulse is part of PetroStreet Drive to bring in the simplicity, authenticity and affordability to engineering software solutions

SPARK & ARC EDITIONS

Suiting the needs of an individual, mid-sized companies & enterprises with multiple users working, reviewing & auditing welding

Starting \$99
